

MEDI CAPTURE

Medical Imaging Made Easy™

MediCap™ USB170

The MediCap USB170 is the medical industry's easiest full-featured image recording solution. Your images are saved directly to a USB flash drive or optional hard drive — a much simpler method than trying to capture images with a DVD recorder.

Medical Image Recorder

The MediCap is even simpler than the pocket camera you use on vacation. It records high quality still images from your endoscope, arthroscope, surgical camera, ultrasound, etc.

Intuitive Use

It's so easy, most users never look at the manual. Just plug it in and go. You'll be saving images within minutes of opening the box.

Medical Grade

With its steel case and fluid resistant front panel, the MediCap is built to withstand the rigors of the OR, and it's so compact it will fit on any cart.

Powerful Options

compatible – versatile – affordable

USB Hard Drive

Perfect for archiving thousands of images on a single device

USB Keyboard

Input patient data to organize your image library

Network Adapter

Turn your USB170 into a mapped drive on your network

Foot Pedals

Connect your USB170 to your scope's trigger or to a foot pedal

Also Available...

MediCap™ USB200

All the features of the USB170, plus video recording. Holds two hours of video on the included flash drive or hundreds of hours on an optional hard drive.
