

For the Upper G.I. Tract -Ultra slim type-

EG-270N5

EG-270N5 gastrointestinal videoscope boasts a super-thin insertion tube and a smaller outer diameter to make insertion into the upper digestive tract easier than ever. A new miniaturized CCD chip built into the scope's tip allows for a reduced outer diameter (5.9mm). It also incorporates a 2.0mm channel and a distal-end irrigation nozzle to ensure clear images.

G5 ENDOSCOPY **ULTRA SLIM**

Viewing direction	Forward
Observation range	3 ~100mm
Field of view	120 °
Distal end diameter	5.9mm
Flexible portion diameter	5.9mm
Bending capability :UP	210 °
DOWN	90 °
LEFT	100 °
RIGHT	
Forceps channel diameter	2.0mm
Working length	1,100mm
Total length	1,400mm
